

Microflex®

Flexibility of installation and energy saving in a winery

Case study

AIM

Optimizes the performance of the heating system, ensuring effective energy savings.

• CLIENT

Saltoki Rioja

• WHERE

Trus, one of the most important winery of Valladolid

• WHEN

January 2021

• SOLUTION

Pre-insulated flexible piping system Microflex
- Watts products:
Microflex M16090CWI y
MD1605032SWI

In January 2021 the **pre-insulated flexible piping system Microflex** has been chosen to realize water, sanitary and heating systems of the new plant section of one of the most important winery of Valladolid. It is a winery called TRUS and it is located in one of the richest vineyards of Valladolid, where wines get the Ribera del Duero certificate of origin.

TRUS - One of the most important winery of Valladolid

The Microflex® system

Watts provided a full range of pipings (MICROFLEX UNO, MICROFLEX DUO) which made it possible to adapt the system to all stages of installation.

Thanks to the **low weight** and **high flexibility**, the pipings are easy to be laid and have allowed the installer to simply realize a small excavation. *“The product flexibility – client declares – is a fundamental aspect for an installation of this size because it made the possibility to create a long underground path and to overcome obstacles with agility, creating curves and changes of direction”.*

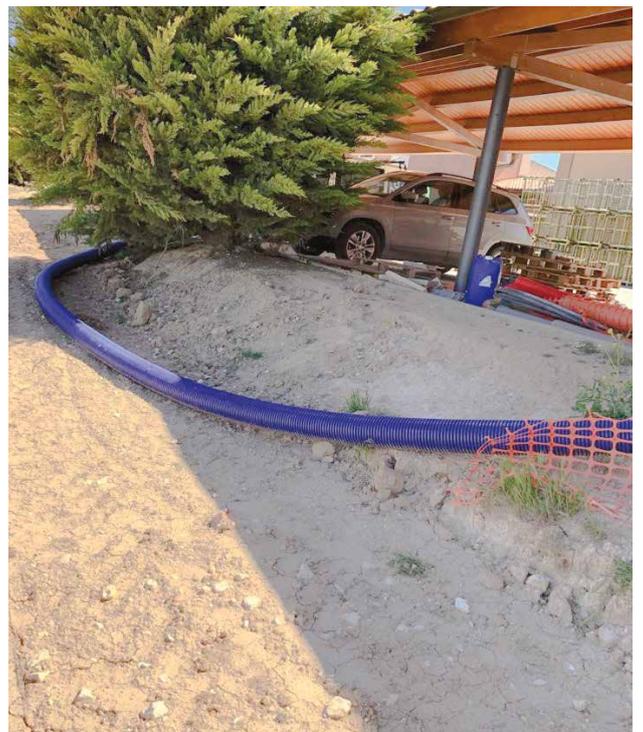

The specific characteristics of Microflex system, furthermore, have allowed to **reduce heat losses to a minimum**, get **excellent insulation** and optimize the performance of the heating system guaranteeing effective energy savings.

The customer opinion

“Microflex pipes were delivered very quickly, in 7 days the product was ready for installation. This made it possible to successfully and quickly build a large plant. The quality of the service, the punctuality in delivery times and the flexibility of the system are the strengths of the Microflex piping system that made us choose Watts as the optimal solution for this plant.”

About us

Watts is an American multinational and one of the world's biggest manufacturers of plumbing and heating products and components. Established in 1874, it is based in North Andover (USA) and listed on the New York Stock Exchange. It has one administrative site, two production facilities and two research centres in Italy. Thanks to its know-how, reliability, professional ethics and attention to health, safety and the environment, Watts contributes to technological research in the sector, with a continuous focus on energy saving, safety and quality of life.
